

Define CS, fit into CC		1. CUSTOMER SEGMENT(S) The customer who are going to use this project includes Large Scale Farmers Small Scale Farmers	6. CUSTOMER CONSTRAINTS Lack of proper irrigation facilities, production machinery, and access to institutional credit, difficulties procuring inputs and storing products, and negative impacts of climate were identified as the major constraints to agricultural productivity.	5. AVAILABLE SOLUTIONS Precision Agriculture, Crop Monitoring, Irrigation Management, Fertilizer Management Weather Forecasting are best solutions for provided for the farmers.	Explore AS, differentiate
Focus on J&P, tap into BE, understand RC		2. JOBS-TO-BE-DONE / PROBLEMS IoT devices connect and interact with each other, and the internet which means they can work together to send alerts or automate other things such as sprinklers in an orchard.	9. PROBLEM ROOT CAUSE RC By adopting IoT in the agricultural sector, we get numerous benefits, but still, there are challenges faced by IoT in agricultural sectors.	7. BEHAVIOUR The customer wants to make the revolutionary propagation in the rating of the irrigation through the reliability of the amount of water availability on the land.	Focus on J&P, tap into BE, understand RC
Identify strong TR & EM	3. TRIGGERS Smart farming reduces the ecological footprint of farming	10. YOUR SOLUTION Our solution for this project is the smart irrigation facilities using IoT based on moisture and temperature		8. CHANNELS of BEHAVIOR The channels of behavior recombine the ratio of the following Online Offline	
	4. EMOTIONS: BEFORE / AFTER Turning the face of conventional agriculture methods by not only making it optimal but also making it cost efficient for farmers and reducing crop wastage				
				Identify strong TR & EM
